## PROFILE

Engineering graduate with hands-on SQL and Python/pandas experience, professional industrial automation experience and extracurricular work on survey frameworks and KPIs. Project work covers relational sales analysis, metadata preparation and interactive data applications.

## TECHNICAL SKILLS

Programming and data: SQL, MySQL, Python, pandas, NumPy, SQLite

**Analysis and presentation:** Data cleaning, tabulation, KPI definition, matplotlib, Streamlit

**Engineering context:** Industrial automation, WinCC SCADA, PLC signals, robotic additive manufacturing

## SELECTED PROJECTS

Chinook Sales Analysis — Sample Retail Database
MySQL, SQL joins, CTEs, window functions

- Analysed customer spending, billing-country revenue and genre concentration using multi-table joins, aggregations and window functions.
- Calculated that the top three genres contributed 63.13% of recorded sample-data revenue; documented findings and analytical limitations.

**Content-Based Movie Recommendation System**
Python, pandas, scikit-learn, Streamlit

- Implemented preparation of movie and credits data with duplicate-ID checks, missing-metadata handling and title disambiguation.
- Built TF-IDF feature representations and a Streamlit interface exposing weighted content-similarity scores.

## PROFESSIONAL EXPERIENCE

**Junior Robotics Engineer**
Simpliforge Creations | Hyderabad, India | Dec 2025 – May 2026

- Programmed and simulated ABB robots using RAPID and RobotStudio for concrete 3D printing; configured workobjects and tool data.
- Monitored PLC signals and process parameters, investigated robot-execution issues and maintained project reporting.

**Design & Application Engineer (Intern)**
Automation Systems and Services | Kuala Lumpur, Malaysia | Nov 2023 – Feb 2024

- Supported WinCC SCADA layouts, PLC signal checks, system validation and technical documentation for industrial-automation deployments.
- Reorganized packing and system-setup workflows during time-sensitive deployments.

## EXTRACURRICULAR CONSULTING

**Consultant**
180 Degrees Consulting, Monash University | Feb 2021 – May 2021

- Co-developed survey templates and mid-/post-programme assessments for social-sector initiatives.
- Designed tabulation methods and KPIs to support programme evaluation and reporting.

## EDUCATION

**Bachelor of Engineering (Honours) — Robotics and Mechatronics Engineering**

Monash University | Graduated July 2025
